QuestLabs Ai, Remote

Apr 2024 - Feb 2026

PROFESSIONAL SUMMARY

Motivated Full Stack Developer with a strong foundation in Java, Spring Boot, and modern web technologies. Passionate about building scalable applications and continuously learning in a collaborative environment.

PROFESSIONAL EXPERIENCE

QuestLabs AI - Software Engineer

- Built end-to-end Workflows feature (FE + BE) enabling users to automate multi-step business processes
- Developed User Segmentation system (FE + BE) for targeted audience filtering and grouping
- Implemented Email Campaigns and Push Notification Campaigns with scheduling and analytics
- Delivered Blueprint & Milestones feature for project tracking; built Webhook & Alerts system
- Core contributor to Greta — an AI-powered website generator platform (similar to Lovable/Replit), including a visual page Inspector tool for editing AI-generated web pages and AI agent integrations
- Built HelpHub — a full cross-platform mobile app (Android + iOS) for end-user chat support and analytics dashboards

Open Source NPM Packages

- [React Native Linechart](#) 🔗
Custom line chart library for React Native with flexible styling options
- [React Tour Navigator](#) 🔗
React utility for building guided product tours with step-by-step navigation
- [React Multi-Route Tour](#) 🔗
Extended tour library supporting multi-page / multi-route guided tours

Published Mobile Applications

- [Bhajan Book](#) 🔗
Offline devotional book app — 10K+ downloads on Play Store
- [iCalculator](#) 🔗
iOS-style calculator for Android — 10K+ downloads
- [InventorySense Lite](#) 🔗
Offline inventory management app for vendors using SQLite — polished UI, 100+ downloads
